

Top 6 Reasons for Choosing SaaS*

- 1. Accessible Anywhere**
- 2. Saves Time**
- 3. Increase Productivity**
- 4. Reduce Costs**
- 5. Increase Security**
- 6. Continual upgrading**

1. Accessible Anywhere – available on all computers via the Internet and mobile devices and even via desktop apps that do not require Internet access.
2. Saves Time – firms can focus more on the business and less on back office work.
3. Increases Productivity – ability to work from anywhere at anytime and work more efficiently due to improved team collaboration.
4. Reduces Costs – reasonable monthly fees and cuts redundant business expenses.
5. Increases Security – If computer system failure occurs on a computer, users can be rest assured that they will never lose important documents since all data is continually backed-up on multiple servers.
6. Access to latest software releases – Continual access to upgrades and the latest software version with no downtime.

Whatever your software needs may be, the cloud's customizable and flexible solutions are the perfect option for expanding small firms, and even for firms just looking to consolidate and cut costs. Legal and small business industries can certainly take advantage of SaaS to reduce overall cost and enhance services.
