

Terrapro

Professional Funeral Home Software

TerraPro helps funeral homes keep track of their daily paperwork.

To do this, it provides single entry of case information onto screens that are organized in much the way information is gathered. As the flow of information from the families served is received, it can be updated and used to generate government and internal forms, memorial merchandise, contract and website information.

In addition, **TerraPro** can interact with state EDRS systems to avoid re-entering case information.

TerraPro works with other websites such as Answering Service for Directors, Front Runner Professional and our own hosted websites to provide seamless linking to your online presence.

TerraPro provides a calendar and case status screens to help in scheduling.

TerraPro gives you one place to maintain your price lists, print them and use them to create templates for your various contract options.

Terrapro gives you remote support at no charge for under 15 minute problem solving.

TerraPro gives you free updates with new features or bug fixes.

TerraPro brings over 30 years of experience providing funeral homes with software they can use and immediate answers to everyday questions.
